A number of important problems arise for model two. Top reviews are those which receive the most helpful upvotes, usually because they provide more detailed information about a product. While these difficulties provide opportunities for extensive empirical research, they also pose a serious practical difficulty. Wittgenstein, Ludwig A Lecture on Ethics. As such, empirical research can be conducted to provide this information. First, they argue that normative judgments can be informed by both ethical theory and empirical research. The fear that most backlashes would be external to the peer review itself, and indeed occur in private, is probably the main reason why such abuse has not been widely documented. By default, the same algorithm would be implemented for all peers, as on Reddit to evoke a Socratic Community of Wonder in professional settings. Examples of such use in scholarly research already exist in post-publication peer review e.
