## Great Barrier Reef Food Web - Food Chain Diagram |

### GreatBarrierReef

Much of ocean life lives in this important aquatic ecosystem. This is why coral reefs form close to the surface of the water and in clear water where the sun can.

### What are corals? | International Coral Reef Initiative

A food web consists of all the food chains in a single ecosystem. Each living thing in an ecosystem is part of multiple food chains. Each food.

Stocker, D. Deep down on a Caribbean reef: lower mesophotic depths harbor a specialized coral-endosymbiont community.

Roberts, J.

An indirect impact of tourism is caused by over-development of coastal areas.

What are corals? July 05, How old is the ocean? Linking the physiological and ecological response of mesophotic reefs to changes in pH and carbonate ion concentration will also be important in the context of understanding how mesophotic coral reef ecosystems will be affected by the shoaling of the saturation horizon in regions such as off Hawaii.

A coral reef is like a city. These realistic images show the large animals and ecosystems also provide services, for example nursery habitat to edible fish species, which would be difficult and expensive to reproduce artificially. The repeating verse style will engage young readers as they gain an appreciation of the plants, fish, and other sea creatures that live in and around the reef.
