September The 16 linear networks X-BFNs are kept along the y axis with their output ports arrayed parallel to the x axis. Table1. Successfully reported this slideshow. A nonreflective-type beam selection BS switch is kept before the input ports to select any one of the nine beams. The net result is the significant enhancement in the SNR at the receiver output when compared to a passive array . Thebottomsideofthelineararraypanelsanddummypanels,whicharecontigu The 2D-modified full Butler BFN provides multiple beams, which fill almost the entire radar probing volume.
